About me

I develop mobile games and apps on Unity Engine major platforms such as Android (Google Play, UDP), IOS (App Store), WebGL (Russian social networks). Also, because of my future specialization, projects with augmented and virtual reality for Android and IOS (Google VR, ARCore & ARKit) and for VR helmets (HTC Vive).

I do all these on Unity Engine with C#. Projects from "FIRGAMESUS" and my university are my personal ones, that are made from scratch. Therefore, I am not only a programmer, but also a game designer. Another apps and games made as part of various teams.

The project portfolio is available on my second website.
